

TEST SESSION

WHAT: HUDY RC TOOLS BAG

All Tooled Up

One of the unspoken challenges that every racer often faces is the never-ending challenge of trying to keep a well-ordered toolbox; of the yin and yang of being well equipped but remaining uncluttered. In those moments of blind frantic panic when you are desperately trying to find that wheel spanner or pinion driver in amongst the chaos of a much loved tool tray, it's too easy to grab the wrong one or simply be unable to find the one you're looking for. If any of this sounds familiar, then you'll be interested, as we were, in the Hudy RC Tool Bag...

➤ The Hudy RC Tool bag is designed to house up to 30 of your favourite and well-used tools in a handy, fold out pouch that is both decorative and protective. Upon opening and folding out the bag, you are presented with four elasticated fabric straps that have been stitched to the bag's inner faced material to provide individually sized tool sleeves – designed to accommodate various screwdrivers, spanners, wrenches and so on. Since no tools are included, the user can tailor the contents of their bag to suit their own purposes.

Nitro users will be able to fit wheel wrenches, clutch tools and glow plug spanners alongside their nut wrenches and hex drivers whereas touring car racers will be able to fit their (Hudy) set up blocks and ride height / droop gauges alongside their spanners, tapered reamers and scissors. The look and feel of the bag is of durable quality but the brightly coloured Hudy graphics could become oil stained or grubby in use as the material does not appear to be 'wipe-clean'. That said, it is undeniably attractive when new and we'll certainly be trying our best

No more misplaced tools with the Hudy bag as they can be slid into elasticated loops, protecting them during transportation and when they are not being used

Our Hudy RC Tools Bag has been used regularly by one of the Racer team who continues to show it off at every opportunity

not to spoil its good looks!

Most racers end up as serial tool collectors, acquiring various specialist tools as their experience and requirements grow. The Hudy RC tool bag is not designed to accommodate everything but even the most discerning racer will have a handful of tools that they simply cannot do without. It is for these indispensable pit-aids that the Tool Bag is designed so stylishly to accommodate. Lesser-

DROOL-TOOL

For the ultimate in professional pitting, of course Hudy also produce some of the most revered and sought after tools on the planet which fit the tool bag perfectly and there's little else to make a grown racer drool than the sight of a beautifully laid out, matching professional tool box! ■

We filled our bag with these unique Hudy tools - unfortunately these don't come in the package

used tools can remain buried in the depths of the ancillary pit equipment but at any meeting, pride of place on the pit table goes to the tools that are most likely to be needed and the opened out Hudy bag is designed to sit perfectly aside any RC car on any pit table.

VERDICT

- ⊕ Perfect size to hold majority of most used tools / Durable construction
- Comfortable carrying handle
- ⊖ Outer sleeve graphics may get dirty easily

Racer Rating: ★★★★★

SUMMARY

Hudy's RC tool bag is a very versatile and useful addition to any racer's pit box. Intended to house a variety of nut wrenches, drivers and specialist spanners, it is large enough to cater for any pit table adventure yet small enough to be hand carried to any venue - be it indoors, outdoors or wherever. Brightly coloured and very durable, you can be sure that it will protect your pride and joy during transport and will give a real 'pro-look' to your pit table. Modestly priced, it makes a great birthday or Christmas present for the discerning racer and can be further complemented by the extensive superb Hudy Tool collection at any time.
